FOUGHT A SHARK.

A Boston Man Has a Desperate Battle in Florida.

BOAT IS NEARLY WATERLOGGED

An Exciting Adventure in the Waters of Florida which Threatened to Cost the Lives of the Fisherman Engaged in it. Finally Had to Let the Shark Go-How Mr. Primes Held on to Him at the Risk

A Tampa, Florida, dispatch published in several papers, gives the following account of an exciting adventure:

Mr. and Mrs. James H. Prince, Boston, have been spending several weeks at the Punta Gorda Hotel, at Punta Gorda, on the west coast. They have returned to Tampa Bay and will remain for some time yet.

Mr. Prince is an enthusiastic bunte

and fisherman, and has been devoting much time on the west coast to the capture of the festive silver king. Fort Myers he had excellent luck,land-ing three large tarpon, besides having a very exciting adventure with a huge spotted shark. They were out fishing ne day, Mr. Prince, the guide, and Mr Foster, of Philadelphia. They has great luck, catching two line tarpon, the larger weighing one hundred and twelve unds and eight ounces, and belinger five feet long. The larger on ught flercely and required all of Mrince's efforts to land him successful

togat fercely and required all of Mr. Prince's efforts to land him successfully. But the most exciting event of the day was their capture, as it were, by a hig apotted shark. After the last tarpon had been landed, it was over half an hour before they received another bite, the fish seeming to have left the place. There's shark round here' remarked Saunders, the guide, sagely. "If these shall ever the sway, it shows these ugly orntes are near by." Hardly had he coased speaking before there came a vicious tug at Mr. Prince's line, and a big channel bass jumped out of the water. In its first rush. As it settled down in the water there was a furfous againston underneath, and the form of a big shark was seen as he grappled the fish and rushed to one side; suapplug the line short of. The loss of his fish made Mr. Prince and and he vowed revengs. There was a long shark line and hook in the boat, and putting a delicate morsel on the big iron hook, it was thrown overboard near where the shark had disappeared. Not enany minutes clapsed before the line straightened out rant with a violent jerk that made the boat tremble from one end to the other, and the big brite was seen to be securely hooked. Finding himself counth, he thrashed he water violently, cossing up the spray dozen of feet, and making a great commution generally. One man was stationed at the bow, holding a the old, but he shark wound a strong starchion beside him. Finding that hould not escape, the big water tiper churned the water un and down, darting to mid frow and finally, with a settled biciousness, started for the boat. As ne came up Saurnders skillfully avaided the rush, and as the shark passed by its elseming tosch showing in the clear rearch he gave it a visious jab with their big gaff. The shark returned the condition to the condition of the condition to the condition of the conditio

He then started off in a new direc-en, the boat being whirled round by a tightening of the rope as if it was

ad so it proved. Back and forth over

And so it proved. Back and forth over the lay the big shark towed the boat, sometimes at railroad speed, and then sain slacking up. At one time, think-ling that he was pretty well exhausted. Mr. Prime drew in the line and got the shark within strikling distance, when a small harpoon that they had in the beat was thrown at him. As the iron penetrated his side, the big fellow gave a less forward, the rope going out so

There was no way of uncoiling the rope, and the boat seemed to be going deeper and deeper as the angry fish increased its speed. Mr. Prince was loth to cut the rope, as he was anxious to secure the big fish. As the speed increased lower went the boat until it was half full of water. Saunders, the ginde grew a little anxious as he sianced around; they were fully two miles from shore, and in deep water, and the sinking of the boat there would be a serious affair.

"Cut the rope, Mr. Prince," shouted he finally; "he is too much for us this time. This is a darned predicament, but we can't help it."

Mr. Prince waited a few seconds lonras no way of uncoiling the

waited a few seconds lon

Mr. Prince waited a few seconds longer, but, finding that the boat was becoming waterlogged and that there was danger of a catastrophe, he unwillingly seized a hatchet that lay on the thwart and cut the rope. The released boat eams to a stop, rocking on the smooth surface of the water, while the last seem of the unview has recorded to the water.

smooth surface of the water, while the last seen of the upright harpoon in the shark it was fast speeding out to sea at the rate of about forty miles an hour.

Mr. Priece, in relating his adventure, says that it was one of the joiliest that he has ever experienced in these waters, and but for the fact of his guide's caution he believes that he would have stuck to his fish until the boat was under water as he was so wrought up der water, as he was so wrought with the excitement of the chase he had forgotten their peril.

GREELEY'S WRITING.

Tough Story About the Eccentric Old Ed-itor's Chirography.

There was only one old printer who

could read Greeley's writing well enough to put it into type. He used to boast that he could read the great edi-tor's wondrous srawl a mile away, says

few minutes, but beyond a muttered oath or two he gave no sign. Lawton went on setting type until about half way through the "copy."

Then he was stuck,
He took the copy over to the foreman and asked:

"Jack, what is that word?"

"I don't know," replied the foreman.
"You know I never could read the stuff."
Lawton took the sheet dear to Comment.

stop.

Lawton took the sheet down to Gree-ley and pointed out to him a particu-larly awful scrawl of the rooster's foot, asking what word that was.

Greeley looked at it a moment and re-bled with a frown:

"Unconstitutional," of course."

Lawton went back to the composing room and finished his task with the ur-livest sang froid.

That Lame Rack can be cured with br. Miles' NERVE PLASTER Only Est.

NO DEMOCRATIC REACTION. A Sensible View Regarding the Recent Lo-cal Elections.

Philadelphia Press: David B. Hill is wiser than those newspapers which have trumpeted the recent elections as showing a general political reaction. He does not attach much importance to them, and shrewdly observes that local

does not attach much importance to them, and shrewdly observes that local elections at this early date cannot be regarded as having any significant bearing one way or another upon the public opinion of the country. They are due almost entirely to beat conditions, and and, so far, as they indicate any broader feeling, it is not a conviction but only an impulse which will respond to changed conditions.

If it were true that the elections portended a change it would be as serious a matter for all right-minded Democrats as it would be for Republicans. For the Democratic organization is still held by the champions of Bryanism and any present tendency towards Democratic revival would mean the ascendancy of this dangerous induce. All friends of public order and sound money and social stability have hoped that the Democratic elements which revolted from Bryan last year would recover possession of the Democratic organization. Until they do, the Democratic influences to day stand just where they did in the last campaign, and any measure of power they may gain is as nuch to be dreaded now as it was then.

The only way in which their control can be shaken is to change the situation must be a practical demonstration that

The only way in which their control can be shaken is to change the situation and present new conditions. There must be a practical demonstration that their claims and contentions are wholly unfounded. This can only come with the success of the present administration and with the return of prosperity under its policy. The administration must have a fair chance to work out its policy and a fair period for the realization of its froits. When its measures shall have been perfected and practically tried, and when good times shall come with them, there will be an end of the discontent which underlies Hryanism and a visible proof of the fallacy which runs through it.

There can, therefore, be no greater folly than the hasty and precipitate declarations of Democratic journals, that are not in sympathy with Bryanism, proclaiming a political reaction. Such statements are equivalent to the proposition that the people who rejected Bryanism last year are ready to accept it this year. This is not true, and the journals which have been misled into such declarations know very well it is not true. If it were, and if there were any prospect that such a change would become permanent, they would lift their hands in horror. Such a condition would menace us with the same perile which we and they fought so hard to escape last year. Such a battle is too serious to be lightly invoked and the danger ought not to be magnified by a reckiess or inconsiderate misinterpretation of existing facts.

ALL those creeping, crawling, singing sensations that combine to make up the tortures of any itching disease of the skin are instantly relieved and permanently cured by Doan's Olament. Take no substitute. Doan's never fails.

FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, April 14.—Money on call

easier at 1% 61% per cent; last loan 1% per cent; closed at 1% 61% per cent. Prime mercantile paper 31/2@4 per cent, Sterling exchange steady with actual business in bankers' bills at \$4 \$7469 4 \$715 for demand, and \$4 \$654 \$815 for \$9 days; posted rates \$4 \$64564 \$7 and \$4 \$854 \$852; commercial bills \$4 \$555. Silver certificates \$2662\footnote{1}_{2}c. Bar silver

The appearance of awakened interest The appearance of awakened interest in stock dealings on the exchange to-day was apparent rather than real. The total sales ran up to 250,000 shares, but Chicago Gas and Sugar absorbed 122,000 shares of these, Chicago Gas being the leader with over 65,000 shares, and Burlington, St. Paul, New York Central and Reading were credited with nearly 50,000 more. Even in the matter of small dealings, the market lacked breadth many stocks usually on the acter of small dealings, the market lacked breadth, many stocks usually on the active list showing no sales, Missouri Pacific and Lackawanna being examples. The heavy volume of dealings in the specialities was almost wholly professional, and outside interest in the market was practically nil. Whatever buoyancy there might have been latent in the market after last nights close, received an effective check in the heavy liquidation in Sugar and Chicago Gas, which became manifest from the opening of the market. A further reduction in some of the refined grades seemed ing of the market. A further reduction in some of the refined grades seemed to dash the hopes of those who have been calculating heavy profits on raw sugars imported in anticipation of the ariff. Reports were also circulated of the illness of a leading official of the company. Enormous blocks of Sugar stock were offered for sale, one lot numbering 2,500 shares and several thousand share lots. The price went down by jumps under this heavy bombardment. What has been counted as inside supwort of Chicago Gas was also withdrawn in face of the large offerings of a prominent operator, whose example a prominent operator, whose example was followed by many other holders A feeling of skepticism became curren regarding recent reports of the certain ty of favorable legislative action in IIII A feeling of skepticism, became current regarding recent reports of the certainty of favorable legislative action in Illinois. There was a period of recovery during the day, but the decline again set in on the reported intention of a legislative committee at Springfield to report in favor of limiting by law the charge for gas in Chicago to 60 cents. The heaviness in these securities affected the whole market more or Jess, though many railroads held firm. The shares of the iron ore companies also reflected the unsettled condition existing in this industry. Short selling was also in evidence to assist the decline. The one was imparted to the coalers by the support in Reading, the strength in Lehigh Valley in the Philadelphia market and the apparent check to the proposed legislative investigation of Lehigh and Wilkesbarre in Pennsylvania. The long heralded announcement officially promulgated, of a contract for the sale of \$100,000,000 of the same class of bonds for the New York & Harlem, had a stimulating effect on the whole market.

lem, had a stimulating effect on the whole market.

Prices went to the highest of the day on the rally and quite generally showed net gains over last night's closing. But prices failed to hold. There was some natural reaction in view of the fact that the New York Central refunding plan, with its saving of fixed charges, had long been discounted.

The fact that only \$85,600,000 of the issue was to be applied to refunding, while \$15,000,000 was to be sold for new construction after 1903, awaiened apprehensions that too much had been allowed to the reduction in fixed charges to result from the refunding. This doubt was reflected in quite a sharp reaction in New York Central, and, by sympathy, in Omaha, these being the only Vanderbitt properties in which there were dealings of any importance. there were dealings of any importance.

DUFFALO, N. V.

Pillsbury's Best Flour is the World's Best Flour

Not merely because it makes the whitest, most delicious and most economical Bread-

But because it is pre-eminently nutritious.

The net result of the irregular fluctuations in Chicago Gas and Sugar was a loss of 2½ per cent in the former and 2 per cent in the former and 2 per cent in the latter. The notable gains on the rally were: Burlington 1: Delaware & Hudson and New Jersey Central 1½; Manhattan 1; New York Central 1½ and Omaha ½ per cent. The final reaction caused losses as follows: Burlington ½: Delaware & Hudson 1; New York Central 1½; Manhattan ½: New Jersey Central 1½; Manhattan ½: New York Central 1½ and Omaha 1½ per cent, Minnesota Iron suffering a net loss of 3 points.

The total sales of stocks to-day were 220,247 shares.
Eyening Post's London financial cablegram:

The stock markets, although irregular and uncertain to-day, were better,

The stock markets, although irregu-lar and uncertain to-day, were better, on the whole, and the house (exchange)

decided to close on Saturday next. Con-sols and home rails had the best mar-

sols and home rails had the best market.
There was a distinct rise in Americans. New York Centrals were the feature, and were bought by New York principally. Details of the funding scheme are expected to-morrow.
Those who took a hopeful view of Americans believe that the time is coming when these funding schemes will

CHICAGO—Wheat was weak at the start to-day and strong at the finish, closing with a ½c advance. A good export business was responsible for the rally. Corn and oats trailed along after wheat, but did not have so much vitality, oats closing unchanged and corn a shade lower. Provisions declined 2½%

Wheat speculators were rather at a Wheat speculators were rather at a loss which way to turn at the opening to-day. Right at the start the tone was firm and some of the early transactions were at the close last night, the strength being due to the unexpected action of the Liverpool market which was ½d to ¾d higher, notwithstanding the drop of ½c here yesterday. This brought a momentary rush of buying orders and for a short time the feeling seemed firm.

orders and for a short than seemed firm.
But the trade soon began to suspect manipulations abroad and the buyers got more cautious; then came rumors of the failure of Barney Barnato, the great Kaffir stock operator. The reported failure, however, was not confirmed. Perhaps the principal bear factor was the fair weather west. St. Louis was a heavy seller in this market. Northwestern receipts were much Northwestern receipts were much

opened at from '2d to '2d percental higher.

May wheat, which closed yesterday at 67% 667½c opened with sellers and sales at from 67½667%c and closed at 68½c. July kept about %c discount under May until near the end, when it dropped half a cent below it.

The improvement in the weather started corn weak, and the market remained in that condition all morning. An improvement started on the small estimated receipts for to-morrow, the rally being helped by the latest strength of wheat, and nearly all the early loss was recovered. May started unchanged it 23% 627%c and closed at 23%c.

Outs started weak on the clear weather, which was assisted by a disposition among shorts to sell. Later on in the day sympathy with wheat; and better huying generally caused a reaction and at the close values were just where they started. A good business was transacted. Exports amounted to 70,000 bushels. May opened a shade lower at 16%c bid.

Provisions were dull and easier, with business confined to local traders. The opening was lower on the weak hog market and further declines ensued. Some rally occurred late in the day in sympathy with the grain markets. At the close May pork was 10c lower, at \$8 27%. May lard & lower at 18%c 14%c. and May ribs a shade lower at 48 62%.

Estimated receipts Thursday: Wheat, Estimated receipts Thursday: Wheat, Estimated receipts Thursday: Wheat,

62½. Estimated receipts Thursday: Wheat cars; corn, 48 cars; oats, 145 cars;hogs 5 cars; corn, as Cars, outs, 25,000 head. The leading futures ranged as follows:

All trains will run on Eastern Time
J. E. TAUSSIG, Superintendent,

WHEELING & ELM GROVE RAILROAD. On and after Saturday, February 2, 1885, trains will run as follows, city time:

tor's wondrous srawl a mile away, says the Journal of Education.
One night the boys in the Tribune office composing room "put up a job" on the old man. They took two roosters, made them walk around on a newly liked form and then run all over ten sheets of copy puper.

The foreman wrote over it in Greeley's well-known sermel, "The Plain Duty of Congress," and put it ion old man Lawton's hook. I think his name was Lawton, but if it was not it does not matter much.

The old printer picked it up, swore a little, remarked that they had to shove the stuff on the old man, as usual, adjusted his spectacles and began sticking type.

The other printers watched him for a few minutes, but beyond a mittered oath or two he gave no sign. Lawton

The old man never knew how the "copy" was produced.
